Governor General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the Annual Report of the Department of Indian Affairs for the fiscal year ended March 31, 1920.

Respectfully submitted,

JAMES A. LOUGHEED,

Superintendent General of Indian Affairs.

OTTAWA, December, 1920.

REPORT

OF THE

DEPUTY SUPERINTENDENT GENERAL OF
INDIAN AFFAIRS

FOR THE YEAR ENDED MARCH 31, 1920.

REPORT OF THE DEPUTY SUPERINTENDENT GENERAL

OTTAWA, December 1, 1920.

Hon. Sir JAMES A. LOUGHEED, P.C., K.C.M.G.,
Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the report of the Department of Indian Affairs for the year ended March 31, 1920.

THE INDIANS OF CANADA

After a hundred years of civilization the Canadian Indian is a difficult subject to treat within the limit of a brief report. His vocations are so varied, his dwelling-places are scattered so about the broad Dominion that no generalities will serve; a positive statement here becomes a negative there; each fact requires a qualification. Asked to describe a Canadian Indian, one might choose between a medical graduate of McGill University, practising his profession with all the authority of the faculty, or a solitary hunter, making the round of his traps in the remote north country. Each portrait might be drawn to the life, the difference would be absolute, both would be truthful.

It may be conceded that the typical Canadian Indian is the hunter and trapper, and, when one thinks of him, buckskins and beadwork and feathers are still cloaking him with a sort of romance. But these are rarely seen, except in pageants and on holidays when the superior race must be amused by a glimpse of real savages in war-paint. The Indian hunter and trapper follows the craft of his ancestors, clothed in the same manner as other people; his wife and children likewise. His domestic surroundings grow less and less savage. The rabbit-skin robe yet holds its own, and the snowshoe; but the birch-bark canoe is supplanted by the basswood or cedar variety; as likely as not he has a sewing-machine and a gramophone in his tent. The aboriginal hunter is supreme no longer in his own craft; gone is the fiction that he is superior in these pursuits. The white man equals him as a trapper, and holds his own on the trail and in the canoe. But as the margin of the wilderness recedes, it is difficult for comparisons of this kind, to find the Indian of pure blood. There has been through all these years a great interfusion of white blood by lawful union, and by illicit intercourse; legally a man may be an Indian with but a small trace of native blood, if his Indian descent is through the male line. If an Indian woman marries a white man, she ceases to be an Indian in the eye of the law and her children take the status of their father.

Confidently it may be said that the Indian has justified the trust that the early missionaries placed in him, his mentality and temperament and constitution fitted him for progress, and he has valiantly borne the ordeal of contact with our boasted civilization. Although he has been wasted in the struggle, he has not been worsted, and the vestiges of the tribes that remain are of stronger stock as the years go by. For seventy years after the conquest of Canada, Indian administration was in the hands of the Imperial military authorities; it was not until 1845 that the responsibility was transferred to the province of Canada.

11 GEORGE V, A. 1921

The military policy had looked upon the Indians as potential allies or foes, and, during the pioneer days, the feeling was balanced between hope and apprehension. They were kept quiet by presents of scarlet cloth, silver gorgets, brass kettles, and ammunition, with an occasional ration of rum. The fur-traders used the latter fluid as the most precious means of exchange and barter, and the restless, dejected people that were handed over to the province were indeed a problem. One Governor of Upper Canada, seeing them so wretched, resolved to send them back to nature for healing, and to remove them to hunting grounds where they might recuperate or die away unseen. But better counsels prevailed. The missionaries claimed them as material ready for evangelization, and protested that they were capable of lasting improvement. Upper and Lower Canada, not long after that, began a systematic endeavour to educate the Indians, supported by zealous missionary effort. This informal union between church and state still exists, and all Canadian Indian schools are conducted upon a joint agreement between the Government and the denominations as to finances and system. The method has proved successful, and the Indians of Ontario and Quebec, in the older regions of the provinces, are every day entering more and more into the general life of the country. They are farmers, clerks, artisans, teachers, and lumbermen. Some few have qualified as medical doctors, and surveyors; an increasing number are accepting enfranchisement and taking up the responsibilities of citizenship. Although there are reactionary elements among the best educated tribes, and stubborn paganism on the most progressive reserves, the irresistible movement is towards the goal of complete citizenship.

POPULATION

The Indian population of Canada is fairly stable at about one hundred thousand. Among the less civilized groups, the high birth rate balances the high death rate, but, in the civilized tribes, who have met and withstood the first shock of contact with civilization, there is an appreciable gain, not only in numbers, but in physical standards. These latter people have long ago proved their worth, and only need to develop and mature under protection until they, one and all, reach their destined goal, full British citizenship.

AGRICULTURE

ONTARIO

In previous reports I have outlined the manner in which the department supervises the agricultural activities of the Indians of Ontario by employing field agents who visit the various reserves and instruct the Indians in modern methods of farming. This policy has proved to be of great benefit to the farming Indians in this province. While at the reserves, the field agents make a general inspection of the schools, equipment, outbuildings, yards, etc., and also of the roads, bridges, drains, timber, and land.

Ploughing matches.—Ploughing matches have been organized at Deseronto, Muncey, Moravian, St. Regis, Sarnia, Cape Croker, and the Alnwick reserves. Prizes are given for competitions in sod in stubble for adults and for young boys. The prize winners were in some cases taken to the provincial matches at Hamilton and at Ste. Annes, Que. The ploughing matches are a decided factor in the improvement of the ploughing on the reserves where they have been held.

School Fairs.—School fairs have been organized at Six Nations, Muncey, Walpole Island, Rama, Cape Croker, Deseronto and New Credit reserves. Pure seed was furnished and also eggs to the children. The pure seed oats and potatoes supplied some time ago to the schools have already resulted in large fields of good crops.

SESSIONAL PAPER No. 27

Standing Crop Competitions.—Standing crop competitions have been organized on the Deseronto, St. Regis, Cape Croker, Moravian, Walpole Island, New Credit, Saugeen and Muncey reserves and vegetable garden competitions on the Muncey, Sarnia, Rama, Mud Lake, Rice Lake and Alnwick reserves. The crop competition is very helpful in bringing about the desired effect of better crops on the reserves, better seed is being planted, better methods of cultivation and fertilization are employed and a more determined effort on the part of the contestant to produce better results is noticeable.

Lectures in Agriculture.—During the spring a course of lectures was held on a number of the reserves. In most cases they were well attended and an interest in advanced methods of farming was evident throughout the meetings, the Indians often taking a most intelligent part in the discussions.

THE PRAIRIE PROVINCES

Nearly half a century ago the aboriginal title to the vast areas east of the Rocky mountains was extinguished by treaties; annual gifts of cash, special reserved lands, assistance in agriculture and education were promised by the Government. For a time the plains Indians had to be fed, owing to the disappearance of the buffalo, but gradually stock-raising and agriculture were introduced, and now hardly a pound of gratuitous food is issued.

Manitoba.—The following is a statement of the Indian crops this season in the province of Manitoba:—

	Acres	Bushels
Wheat..	3,137	31,505
Oats..	2,217	38,165
Barley..	1,354	13,100
	6,708	82,760

It will be seen from the above figures that the average per acre for wheat was about 10 bushels; oats 17½ bushels, and barley 10 bushels. These averages are about equal with the yields throughout the Prairie Provinces. Early in June there was every indication of a heavy yield in this province, but the warm spell with hot winds did much damage and reduced the yield considerably.

The root crop in the province of Manitoba was fair; 266 acres of potatoes yielded 20,349 bushels; 38 acres of turnips yielded 1,031 bushels. In addition to these roots the Indians had in 39 acres of gardens.

Saskatchewan.—In the province of Saskatchewan the Indians had a large acreage sown, but, like the Indians of Manitoba, suffered considerably from drought and hot winds. This remark applies to all sections of the province.

The following crops were sown and harvested:—

	Acres	Bushels
Wheat..	8,024	90,403
Oats..	14,311	212,123
Barley..	522	5,856
	22,857	308,382

The Indians of this province planted 61 acres of potatoes, which yielded them 8,028 bushels, 24 acres of turnips, which yielded 2,821 bushels, and in addition to this had 76 acres of gardens.

Alberta.—In Alberta the Indians fared much better than in the other two provinces, particularly those Indians living on the reserves in the southern part of Alberta, where there were periodical showers just at the most opportune times.

11 GEORGE V, A. 1921

The following crops were sown and harvested: -

	Acres	Bushels
Wheat..	9,700	155,510
Oats..	6,779	142,923
Barley	611	15,027
	<hr/>	<hr/>
	17,090	313,460

It will be noticed from the above figures that the yield was much higher per acre than in the other two provinces, above mentioned. The crop on the Blackfoot reserve was particularly good. The Indians of that band harvested 103,290 bushels of wheat and 24,000 bushels of oats. The crop here was a bumper one, and these Indians have never been in such good circumstances.

The Indians of the three western provinces broke 4,500 acres of land and summer-fallowed 15,735 acres, which was very satisfactory. Generally speaking, there has been a decided improvement in the class of work the Indians are doing. In addition to the work done on the land, the Indians have put up 65,550 tons of hay. A large proportion of this hay will be fed to their own stock, the balance will be sold.

The reports indicate that there will be no shortage of feed on any of the reserves in Western Canada this winter, as extra precautions were taken to see that a large quantity of feed was provided.

This year, up to the time of writing, the Indians have sold \$64,000 of cattle, and it is expected that there will be a few thousand dollars' worth yet to sell. The Indians of the three provinces own 17,135 head of cattle. They should own more, and every effort is being made to substantially increase their herds. In addition to the cattle, they own 12,000 head of horses, the majority of which are of the working type. The pony is fast disappearing.

GOVERNMENT GREATER PRODUCTION FARMS ON INDIAN RESERVES

As it was found that in the Prairie Provinces there was a large area of good land on Indian reserves that had hitherto been unused, it was two years ago decided to establish Government Greater Production Farms. In order to expedite this work and utilize the services of the department's staff to the best advantage in connection therewith, Mr. W. M. Graham was appointed as commissioner for the provinces of Manitoba, Saskatchewan, and Alberta. Mr. Graham has the sole charge of this work, subject to the approval of the Superintendent General. This plan of organization has been the means of placing large new areas under cultivation.

There has been harvested on these farms during the past season 378,000 bushels of wheat and oats, principally wheat. At one time it looked as if the crop would run to over 600,000 bushels, but the dry spell in Saskatchewan during the latter part of June reduced the yield considerably. Notwithstanding this, there has been a large and profitable crop. The Greater Production Farms in Alberta yielded at least three times as much per acre as did the Saskatchewan farms. On the Blackfoot reserve alone over 200,000 bushels of wheat was harvested.

In addition to the Greater Production work actually carried on by the department, lands have been leased on the reserves for the purpose of growing grain, and on these lands it is estimated that the lessees have raised about 371,000 bushels of grain.

The total amount of grain grown in Manitoba, Saskatchewan, and Alberta on Indian reserves is estimated to be about 1,400,000 bushels.

BRITISH COLUMBIA

Agriculture is each year taking a firmer hold among the Indians of British Columbia. As a rule the young men just out of school will not take kindly to work

SESSIONAL PAPER No. 27

of any kind for a few years after attaining their freedom. But there are exceptions, and a change for the better is coming slowly but surely, and will be more rapid as time shows the success of the older men. On many reserves in the Dry Belt the limited amount of water available for irrigation purposes militates seriously against a large acreage being cultivated. Destructive insects and diseases in the orchards and crops are materially decreasing, in most instances being quite intelligently combatted by the owners who are learning to use the spramotor outfits supplied by the department to good purpose.

The number of exhibits placed by various bands in the different agricultural exhibitions is increasing yearly and steadily improving in quality. At the New Westminster exhibition the Indian exhibit and the variety and excellence of their garden products, bottled fruits, jams, bread, butter and various cakes and other samples of culinary and household art, as well as native manufactures was most creditable and beautifully put up and arranged.

MARITIME PROVINCES

There is an annual parliamentary appropriation for Nova Scotia and also for New Brunswick for the purchase of seed grain, and the encouragement of agriculture among the Indians. Assistance is also given to individual farmers where required in Prince Edward Island.

QUEBEC

The Indians living in agricultural districts in the province of Quebec are taking much greater interest in farming, especially in the Restigouche, Pointe Bleue, St. Regis, Maniwaki, and Oka agencies.

GENERAL

The following table shows an increase in the land under crop, and value of the products as compared with last year:—

LAND UNDER CROP.—PRODUCTION AND VALUE OF THE PRODUCTS

Province.	Population.	Land under Crop. ²	Grain.	Roots.	Hay.	Value of Farm Products.

²Decrease.

³Exclusive of hay lands.

INDIAN SOLDIER SETTLEMENT

There has been much activity in connection with Indian Soldier Settlement, 160 loans have been granted and there are a considerable number either authorized or under consideration. The total amount expended to date is \$290,214.27, made up as follows:—

Acquiring of land.. . . .	\$126,723 00
Payment of encumbrances.. . . .	6,685 89
Improvement of land.. . . .	4,309 95
Erection of buildings.. . . .	24,096 84
Purchase of live stock.. . . .	45,641 64
Purchase of machinery and implements.. . . .	27,322 30
Purchase of harness	4,968 19
Purchase of seed grain and provisions	14,455 44
Payment of premiums on insurance	1,981 15
Unclassified and sundry items.. . . .	2,892 78

To this is added \$31,136.17 of advanced cheques only partially accounted for.

It is estimated that all the loans in Canada to Indians will not exceed \$1,000,000.

The department has exercised the greatest care in making these loans. Each applicant has been considered according to his merits and a loan was not granted if it was found that an applicant was unlikely to prove to be a successful farmer. Constant supervision over and inspection of work carried on by individuals was instituted with the result that only four Indians have proved unsuccessful farmers and in these instances immediate arrangements were made to have the land, implements and stock taken over by some other returned soldier without loss to the department.

The crops have, almost everywhere, been extremely good and the repayments have been more satisfactory than had been hoped for. A number of the settlers have taken advantage of the enfranchisement clause and same have turned over to the department the full amounts payable to them, thus materially reducing their loans. Repayments to date amount to \$9,400, and by the time the crop is harvested it is expected that almost the full amount of instalment will be paid.

On the whole, the returned Indian soldiers who have been granted loans have worked in a most satisfactory manner and will be a credit to any community. The scheme has worked out to advantage not only to the individual but also to the other members of the band and the reserve itself. The settlers once given the opportunity to commence operations on the proper scale have demonstrated by industry and enthusiasm the benefits of modern farming operations. Others have followed their example. The result has been,—considerably increased prosperity and increase in value of the cultivated farms, as well as general increase in land values of many of the reserves.

Individual Savings.—Early during the war the department was called upon to administer the estates of Indians called overseas and to take charge of the pensions assigned pay, and separation allowances of a large number of Indians. Here again each case is considered on its merits.

The amounts paid by the Militia Department or the Board of Pension Commissioners are placed in individual savings accounts and withdrawals are made from time to time as necessary. It has been found possible in this way to effect a large saving, particularly in the cases of minor children who are maintained in departmental schools and whose pensions are funded for their future use. The net balance in this particular savings account is \$38,478.54, which is more than one-third of the total individual savings held by the department.

SESSIONAL PAPER No. 27

AMENDMENTS TO THE INDIAN ACT

Important amendments to the Indian Act with regard to the subject of enfranchisement and education were passed at the 1920 session of Parliament.

The amendments repealed sections 107 and 122. These clauses had been upon the statutes since 1857 and under them it was found possible to enfranchise only 65 Indian families of 102 persons since Confederation or during a period of 53 years. As the ultimate object of our Indian policy is to merge the natives in the citizenship of the country, it will be seen that these clauses were inadequate. Under these clauses, it took six years for an Indian to become enfranchised, and the applicant was wearied by this additional six years of tutelage before he was deemed fit to handle his own property and take his place among the citizens of the country.

At the session of 1918, Parliament passed an amendment to the Indian Act, which enables the Governor General in Council to enfranchise, on application, all Indians who have no land on reserves and who are willing to accept their share of the funds of the band and to give up any title to the lands on the reserve. This amendment has served to show that numbers of Indians desire to take the final step towards citizenship, as to date the department enfranchised 97 families of 258 individuals under its provisions. There is further evidence bearing in the same direction, consisting of individual applications for enfranchisement from Indians who are holders of property on reserves.

The new sections passed at the session of 1920 give the Superintendent General power to make inquiry and report from time to time as to the fitness of any Indian or Indians for enfranchisement, and they give the Governor General in Council authority, acting on such reports, to enfranchise an Indian and his wife and minor unmarried children forthwith. The clauses provide adequately for the protection of the individual interests in the lands and moneys of the band.

The amendment provides for the repeal of sections 9, 10 and 11 of the Act, and the substitution of the sections drafted. The department is thus enabled to establish a system of compulsory education at both day and residential schools. Prior to the passing of these amendments the Act did not give the Governor in Council power to make regulations enforcing the residence and attendance of Indian children at residential schools, as the department could only commit to a residential school when a day school is provided, and the child does not attend.

The recent amendments give the department control and remove from the Indian parent the responsibility for the care and education of his child, and the best interests of the Indians are promoted and fully protected. The clauses apply to every Indian child over the age of seven and under the age of fifteen.

If a day school is in effective operation, as is the case on many of the reserves in the eastern provinces, there will be no interruption of such parental sway as exists. Where a day school cannot be properly operated, the child may be assigned to the nearest available industrial or boarding school. All such schools are open to inspection and must be conducted according to a standard already in existence. A regular summer vacation is provided for, and the transportation expenses of the children are paid by the department.

EDUCATION

A total of 321 Indian schools of all classes were in operation during the year, namely, 247 day, 58 boarding, and 16 industrial. In the tabular statements in part II of this report will be found a list of these schools, giving the reserve, agency and province and the enrolment in each case.

As compared with the previous year there is a decrease of one school, which is in the day school class.

11 GEORGE V, A. 1921

Several day schools were closed owing to lack of attendance or inability to secure teachers, while several schools in this class which had been closed for some time were reopened, and new schools started at several points.

The industrial school at Red Deer was closed from June 30, 1919, but, as it was in operation for a part of the fiscal year, it is included in the statistical statement. Operations are under way to erect a new school to replace it on a new site which has been obtained near the city of Edmonton.

The total enrolment for the year was 12,196 pupils, 6,020 boys and 6,176 girls. This, as compared with the preceding year, shows an increased enrolment of 244 pupils. There was an enrolment of 7,477 in the day schools, 3,081 in the boarding schools and 1,638 in the industrial schools.

The average attendance during the year at these three classes of schools was 7,629, which is practically the same as for the preceding year, when it was 7,532.

The percentage of attendance of the number enrolled during the year was 62.56.

In addition to the above there are about 125 Indian children, the greater number of whom are orphans, being provided for and educated in public and private residential schools throughout the Dominion, besides a number who are attending high schools.

The 321 schools, comprising day, boarding and industrial, in operation during the year, were conducted under the following auspices: Undenominational, 51 day and 1 industrial; Roman Catholic, 83 day, 32 boarding and 8 industrial; Church of England, 67 day, 16 boarding and 3 industrial; Methodist, 41 day, 3 boarding and 4 industrial; Presbyterian, 4 day and 7 boarding, and the Salvation Army, 1 day school.

The Indian schools in Ontario, Quebec, Nova Scotia, and Prince Edward Island are inspected semi-annually by the provincial, separate and public school inspectors under arrangements with the Department of Education in each province. In New Brunswick and British Columbia, Indian schools are inspected by officials appointed by the department. In Manitoba, Saskatchewan, Alberta, and the Northwest Territories the schools are inspected by the inspectors for the different Indian agencies; regular visits are made and reports submitted to the department. In addition to this inspection, almost all the schools are under supervision of the different Indian agents, who are required to make monthly inspections and reports.

Qualified teachers with professional training are engaged whenever it is possible to obtain them. In the older settled portions of the different provinces the greater number of the teachers are so qualified. In the schools situated on the more remote reserves it is difficult to secure teachers with certificates. Many of our teachers who have not professional qualifications have, however, long experience and are meeting with a great measure of success in Indian school work.

Our school buildings in most cases compare favourably with white schools similarly situated, and also in the work performed in the class-room and in the equipment provided.

The course of study is that prescribed for the provincial public and separate schools and is strictly followed.

There is land for farming and gardening purposes provided at practically all the residential schools. The pupils are thus enabled to receive a general knowledge of agriculture, which should be of great benefit to them after leaving school.

The granting of assistance to graduates to encourage farming has been maintained. Upon leaving school a male ex-pupil may be given a grant of cattle, horses, implements or building material. During the past year 10 girls and 14 boys, ex-pupils, have been assisted to the extent of \$3,199.28, and refunds on previous loans granted in the way of assistance to the extent of \$691.25 have been received.

The expenditure on Indian education from Parliamentary Appropriation during the year amounted to \$1,057,622.74. The following statement will show the expenditure for the fiscal year ended March 31, 1920, for Indian education from parliamentary appropriation:—

SESSIONAL PAPER No. 27

11 GEORGE V, A. 1921

In addition to the above the various bands of Indians whose funds are sufficient to meet the outlay, contributed the sum of \$41,239.97 towards the payment of teachers' salaries, general expenses and the maintenance of school buildings on their reserves. For the fiscal year ended March 31, 1920, the amounts so contributed have been as follows:—

Acct. No.	Band	Interest	Capital
1	Batchawana Band.. . . .	\$ 643 03	
2	Chippewas of Beausoliel.. . . .	798 75	
3	Chippewas of Nawash.. . . .	2,226 92

11 GEORGE V, A. 1921

BUILDINGS

New Indian boarding schools have been built at Alberni, B.C., and Chapleau, Ont. A new boarding school is under course of construction at Fraser Lake, B.C. A day school is being built at Nanaimo and Sliammon, B.C. Alterations and repairs have been made to the heating systems at Old Suns and Sarcee schools. An Indian wing has been built to the Lady Minto Hospital, Cochrane. A teacher's residence has been built at Moraviantown. A horsebarn, implement shed, teachers' residence and workshop have been built in connection with the proposed new Indian boarding school at Edmonton. At Caughnawaga alterations and additions were carried out to the hospital. The schools have been repainted and a small fire-station erected.

ROADS, BRIDGES, DRAINAGE, WATERWORKS AND IRRIGATION SYSTEMS

The following is a summary of the works which have been carried out during the current year on the various Indian reserves.

ROADWORK

Repairs and improvements have been performed on main roads on the following reserves:—

Province of Ontario.—Tyendinaga, Six Nation, Sarnia, Rama and Cote.

Province of Quebec.—Caughnawaga, Abenakis and Doncaster.

Province of New Brunswick.—Tobique.

Province of Nova Scotia.—Whycocomagh, Richmond county and Middle River.

Prince Edward Island.—

Western Provinces.—Saddle Lake, Peguis, Fisher River.

The macadamizing of the following roads are in the course of construction: Shore Road, Tyendinaga Indian Reserve, Ont.; Huntingdon Road, Caughnawaga, Que.

BRIDGES

A new bridge has been completed over the Brokenhead river, Brokenhead Indian Reserve, Manitoba, and others are in the course of construction over the Boston creek, on the Six Nation Indian reserve; also over the Bitoubi creek and Gatineau road, on the Maniwaki Indian reserve, Quebec.

Repairs to bridges have been performed on the Peguis, Stella and Caughnawaga Indian reserves.

WATERWORKS

A complete system of water supply has been provided for the schools in Caughnawaga, and others are in course of completion at the Sechelt and Kamloops boarding schools.

IRRIGATION SYSTEMS

Irrigation works have been performed on the Kamloops Indian reserve.

SESSIONAL PAPER No. 27

DRAINS

A number of drains have been constructed on the Caughnawaga, Caradoc, Six Nation, St. Regis, Sarnia and Tyendinaga Indian reserves. These drains are required for the improvement of farming land and the maintenance of roads on these reserves.

SURVEYS

The following are the principal items of work in connection with the survey branch during the fiscal year ending March 31, 1920.

NOVA SCOTIA

At the request of the timber lessees, the limits of the Grand Lake Indian reserve, Halifax county, were re-traced as they had become much obliterated.

On account of alleged trespasses, the limits of the Indian reserve at New Germany, Lunenburg county, were resurveyed.

A resurvey was made of the Indian Brook reserve, Hants county, to define correctly the disputed limits of certain timber lands.

ONTARIO

A survey was made of Doran's island, in the St. Lawrence river, in connection with its sale to the Dominion Parks Branch, Department of the Interior.

Portions of blocks A and B, concessions 4 and 5, Chapleau, were surveyed for the Indian Industrial School.

A survey was made of certain flooded lands in the Indian reserve near Fort Frances.

MANITOBA

A road across block E of the Pas reserve has been surveyed to be opened for the convenience of an adjacent half-breed settlement.

A resurvey was made of a portion of the townplot of the Pas to replace a number of posts which had disappeared and for the preparation of a special plan required for registration. Also a revaluation was made of the unsold lots in the whole townplot.

Two small tracts, being reserves Nos. 20-B and 20-C, were surveyed in the Cumberland band.

The following reserves were surveyed for the Pelican Narrows band:—

The Amisk Lake reserve, No. 184, containing 5,121.6 acres.

Birch Portage reserve, No. 184-A, containing 4,557.2 acres.

Pelican Narrows reserve, No. 184-B, containing 1,297.8 acres.

Sandy Narrows reserve, No. 184-C, containing 2,662.8 acres.

Woody Lake reserve, No. 184-E, containing 1,847 acres.

Mirond Lake reserve, No. 184-E, containing 1,847 acres.

A preliminary survey was also made of the Pelican Narrows village.

Six hundred and forty acres were laid out in two tracts for the Pas band, in lieu of their interest in the surrendered Birch River reserve.

Three hundred and twenty-four acres were laid out at Rock Lake, to be known as Indian reserve No. 21-L, and the remainder to be known as Indian reserve No. 21-M, was laid out at a point on the Saskatchewan river, about forty-five miles down the river from the Pas. At this point another tract was surveyed to be given in exchange for the island the band desires to surrender.

The Poplar Point Indian reserve of the Chemawawin band was extended, making its total length two miles.

SASKATCHEWAN

A survey was completed of the townplot of Lakeview, at Regina Beach, and valuations made of the lots.

A survey was made in the Piapot reserve, of the uplands on the north side of the Qu'Appelle river, which have been surrendered for sale.

BRITISH COLUMBIA

A survey was made of the site for a boarding school in lot 81, Alberni.

LANDS

Sales of surrendered surveyed lands are shown in the tabular statement No. 1 herewith, and during the past year 114,819.07 acres were sold, realizing \$1,088,898.73. During the year 533 Crown grants were issued and recorded under the provisions of the Indian Act, and forwarded either direct to the patentees or to the different registrars of titles for the district in which the lands patented were situate, in accordance with the Land Titles Act.

Returns of Crown grants to the number of 52 were prepared and forwarded to the registrars of the counties and districts in which the lands patented were situate, and four returns were made to the Provincial Secretary of Ontario covering lands patented within that province.

On the 12th of June, 1919, the Sarnia Band of Indians surrendered to the Crown 226.18 acres of land on their reserve, comprising lots 33-41 inclusive, River range, Sarnia, which were subsequently sold to Mary E. Oxenham, trustee, for \$71,350.50.

On the 4th of June, 1919, the lands which were surrendered by the Indians on Indian Reserve No. 80A, north of Regina, and which were subdivided into lots, were offered for sale by public auction and a number of the lots were sold, realizing the sum of \$8,280. The remaining undisposed of lands were subsequently placed in the hands of Mr. Commissioner Graham, Regina, for sale at upset prices.

The following lands on Indian reserves in the provinces of Saskatchewan and Alberta, having been surrendered by the Indians under and in accordance with the provisions of the Indian Act, were sold to the Soldier Settlement Board, as follows:—

	Acres	
Crooked Lakes..	2,223.56	\$ 31,852 04
Piapot's..	16,318.00	208,640 00
Poorman's..	8,075 00	92,920 00
Ochapowace—4 rows of sections, comprising.. . .	18,223.40	164,160 00
Bobtail..	6,619.50	79,862 00
Big River..	971.10	16,660 00
Mistawasis..	15,900.40	198,576 00
Muskeg Lake..	8,083.30	135,000 00

LOCATION TICKETS

Location tickets granting title under the provisions of the Indian Act, to individual owners, for lands on the reserves, were issued during the past year to the number of 196, and on the 31st of March last there were current 2,325 location tickets.

LEASES

Under the provisions of section 11 of the Regulations for the disposal of Indian lands, leases were issued, in triplicate, to white men, at the request of Indian locatees, and for the purposes of increased production, to the number of 126, and on the 31st of March last there were 1,278 leases current.

SESSIONAL PAPER No. 27

TIMBER

The quantity of timber cut on Indian reserves during the year, both under license and permit, was as follows:—

Pine, white..fbm	3,713,512
Pine, Norway.. . . .	"	627
Pine, jack.. . . .	"	87,000
Spruce, white and black.. . . .	"	1,859,958

Ties.. . . .	"	75,079
Poles.. . . .	"	1,203
Posts.. . . .	"	915
Boom timber..Cu. ft.	23,196

Sales of timber and bash receipts during the license year were:—

Bonus for timber on Poquiosin.. . . .	\$1,100 00
" " " " Grand Lake.. . . .	10,710 00
" " " " Chats-cah.. . . .	3,000 00
" " " " Cape Mudge.. . . .	6,500 00
" " " " Quae.. . . .	5,285 00
" " " " Black River.. . . .	10,500 00
" " " " Homalco No. 4.. . . .	7,500 00
" " " " Waywaykum.. . . .	4,500 00
" " " " Lac Seul.. . . .	25,200 00
Dues on timber (license).. . . .	148,797 50
" " " (permit).. . . .	7,067 69
" " " (trespass).. . . .	1,649 51
Ground rents and fees.. . . .	1,496 30
Deposits as security.. . . .	2,700 00
Total.. . . .	\$236,006 00

There were thirty-two licenses current on April 30, 1920, being seven more than the previous year, three having terminated and ten new licenses issued. Estimates of timber and reports on land of sixteen reserves were prepared in the course of the usual administrative work, and this data has been added to the record of the natural resources of the Indians which is in course of preparation.

11 GEORGE V, A. 1921

SUMMARY OF INDIAN AFFAIRS IN THE VARIOUS PROVINCES BASED
ON THE REPORT OF THE DEPARTMENT'S AGENTS AND THE
INSPECTORS FOR THE FISCAL YEAR ENDED MARCH 31, 1920.

The local administration of the Indian lands, on the reserves scattered throughout the Dominion, is conducted through the department's agencies, of which there are in all 114. The number of bands included in the agency varies from one to more than thirty. The staff of an agency usually includes various officers in addition to the agent, such as medical officer, clerk, farm instructor, field matron, constable, stockman, etc., according to the special requirements of the agency in question. At many of the smaller agencies in the older provinces, where the Indians are more advanced, the work is comparatively light, requiring only the services of an agent. The work of the agencies is supervised by the department's inspectors, each inspector having charge of a certain number of agencies.

ONTARIO

Agencies.—The following agencies are included in the province of Ontario: Alnwick, Bay of Quinte, Cape Croker, Chapleau, Chippewas, Munsees, and Oneidas of the Thames, Christian Island, Fort Frances, Georgina and Snake Islands, Golden Lake, Gore Bay, Kenora, Lake Superior (Eastern and Western Divisions), Manitowaning, Mississaguas of the Credit, Moravians of the Thames, Parry Sound, Rama, Rice and Mud Lakes, Sarnia, Saugeen, Seugog, Six Nations, Sturgeon Falls, Thessalon, and Walpole Island.

Tribal Origin.—The great majority of the Indians of Ontario are Ojibwas, and are of Algonkin stock. The Oneidas of the Thames, the Mohawks of the Bay of Quinte, the Mohawks of the Parry Sound district, and the Six Nations of Brantford are of Iroquoian stock. There is a band of Pottawattamies at Walpole island, and Delawares at the Caradoc agency; these are of Algonkin stock.

Occupations.—The principal occupation of the Indians in the eastern, central and southern parts of the province is mixed-farming, including grain-growing, stock-raising, vegetable gardening, and dairying. There has been a great improvement during the past few years in their methods of cultivation, which is largely due to the work of the department's field agents.

During the summer months the Indians find a profitable source of income in employment as guides and canoemen for tourists, surveyors, prospectors, and fire rangers. Some of them work as sailors and deckhands for navigation companies on the great lakes, and a number are employed on the railways in summer. In lumbering districts many of the Indians work in the lumber-shanties during the winter months, and at river driving in spring, and in the mills in summer.

Many of the Indians who live in the vicinity of the centres of population are employed as day labourers in the various local industries, such as canning factories, cement works, implement factories, oil refineries, iron works, box factories, brick and tile-making, flax-pulling, etc.

Some of the Indian women are employed as domestics; and many of them derive a considerable income making fancy-work and baskets. At Rice Lake and Savanne some of the women and children engage in berry and wild-rice picking. The Indians still find a profitable source of income in the making of mitts, moccasins, snowshoes, and canoes.

Health.—The health of the Indians of Ontario has, on the whole, been good during the past year. Tuberculosis is their worst enemy, and is responsible for many deaths among them each year.

SESSIONAL PAPER No. 27

Dwellings.—The great majority of the Ontario Indians have frame houses, which are in many cases well built and comfortable, and compare very favourably with those found in white communities. Some of the Indians have houses of stone or brick. At the Christian Island, Georgina and Snake Islands, Fort Frances, Gore Bay, Kenora, Savanne, Fort William, and Sturgeon Falls agencies the majority of the houses are still of log construction. In the districts included in the Chapleau and Fort William agencies many of the Indians continue to live in tepees.

NEW ONTARIO

Hunting and fishing are the chief sources of livelihood for the Indians of north-western Ontario and the James Bay district. Their only other source of income is acting as guides and canoemen in the summer months. These northern districts are not suitable for agriculture, but the Indians are beginning to raise potatoes with some measure of success. These Indians live in tents throughout the year.

They are very subject to tuberculosis, although their health is otherwise good.

QUEBEC

Agencies.—The following agencies are included in the province of Quebec: Becancour, Bersimis, Caughnawaga, Lake St. John, Lorette, Maria, Mingan, Oka, River Desert, Ristigouche, Seven Islands, St. Francis, St. Regis, Timiskaming and Viger.

Tribal Origin.—The principal tribes found in Quebec are: Iroquois at Caughnawaga, lake of Two Mountains, and St. Regis; the Hurons of Lorette are also of Iroquoian stock; the Montagnais, who are also of Algonkin stock, at Bersimis, Mingan, lake St. John, and Seven Islands; the Abenakis, also of Algonkin stock, at Becancour and St. Francis; the Micmacs, also of Algonkin stock, at Maria and Ristigouche; and the Malecites, also of Algonkin stock, at Viger.

Occupations.—In the agricultural districts of the province the Indians are displaying much keener interest in farming, and market gardening, and a marked improvement is observable in their methods of cultivation.

In the Gaspé peninsula and districts adjacent thereto the Indians are chiefly employed in the lumber shanties. In the Maniwaki and North Timiskaming agencies also a number of Indians work in the shanties.

One of the principal industries among the Indians of this province is the making of ash and sweet-grass baskets. A number of them spend the summer in the country resorts in the United States, where they sell baskets to tourists. The Indians also make lacrosse sticks, axe handles, racquets, and moccasins. Some of them are employed as guides to tourists and canoeists.

Health.—On the whole the health of the Indians of Quebec has been good during the past year. In this, as in every other province, tuberculosis is the disease which more than any other threatens the health of the Indians.

Dwellings.—In the settled parts of the province, the great majority of the Indians live in houses of frame construction, which are as a rule comfortable and well built. Some of them have good stone houses. In the more remote northern district many of the Indians continue to dwell in tents.

THE NORTH SHORE

The cod-fishing industry is being successfully developed among the Indians of Mingan, Natashkwan, Romaine, St. Augustine, and Moisie, under departmental supervision.

11 GEORGE V, A. 1921

Although these Indians have always been considered of a naturally indolent disposition, they are rapidly becoming good fishermen, which is surprisingly satisfactory, in view of the arduous character of this industry as carried on in the gulf, where the fisherman's working day begins at three o'clock in the morning, and the last operation of salting is not completed until evening.

I regret to state that the general health of the gulf Indians has not been good during the past few years, and that in consequence their numbers are decreasing.

The Indians of these parts do scarcely any farming or gardening as the climate and soil are not suitable for agriculture. Some of them, however, are beginning to raise a few potatoes.

NEW BRUNSWICK

Agencies.—There are three agencies in the province of New Brunswick, the Northeastern located at Buctouche, the Northern located at Perth, and the South-western located at Fredericton.

Tribal Origin.—The majority of the Indians of New Brunswick belong to the Micmac race, which is of Algonkin stock. In addition to these there are some bands of Malecites, also of Algonkin stock.

Occupations.—In the northeastern division the Indians are engaged in fishing, hunting, trapping, and farming. A number work in the lumber woods during winter and at the lumber mills in summer. In the northern division the Indians work in the woods in winter, river drive in the spring, and are for the most part employed as farm labourers in the summer and fall. In the southeastern division the Indians support themselves chiefly by the sale of Indian wares. In all parts of the provinces the Indians are expert at making baskets, snowshoes, moccasins, and other Indian wares.

The Indians of this province are showing a greater interest in farming than formerly.

Health and Sanitation.—The health of the Indians has been good during the past year, with the exception of cases of tuberculosis. They are learning to pay more attention to sanitary conditions than in the past.

Dwellings.—The great majority of the Indians of New Brunswick live in small frame houses, which in most cases are well built and well cared for. A gradual improvement is observed from year to year in their dwellings and outbuildings.

NOVA SCOTIA

Agencies.—The following agencies are included in the province of Nova Scotia: Yarmouth, Digby, Annapolis, Queens, Shelburne, Lunenburg, Kings, Halifax, Cumberland, Colchester, Pictou, Richmond, Victoria, Inverness, Antigonish-Guys-boro, two in Hants county (Windsor and Shubenacadie), and two in Cape Breton county (Eskasoni and Shubenacadie).

Tribal Origin.—The Indians of Nova Scotia are Micmacs, and are of Algonkin stock.

Occupations.—The great majority of the Indians who reside on reserves in Nova Scotia are farmers in a small way. Their principal agricultural products are hay, potatoes, and garden vegetables. They also raise horses and cattle, but no sheep and very few pigs. Between seed-time and harvest many of them go abroad and find employment in diverse occupations as day labourers. Those who do not live on reserves occupy themselves to a great extent with the manufacture of axe-handles, pick-handles, hockey sticks, butter tubs, baskets of various kinds, etc. A certain

SESSIONAL PAPER No. 27

class, including some who reside on reserves and some who do not, make lumbering in its various branches their chief occupation. They assist in cutting the timber in the forests, in conveying it to the saw-mills, and finally in converting it into boards, deals, scantling, shingles, laths, etc. At certain seasons of the year, hunting, trapping, and acting as guides for sportsmen are also favourite occupations of a certain number, mostly of middle age.

Health and Sanitation.—Sanitary regulations are surprisingly well observed by these Indians, circumstances considered, and as a consequence an improvement in their general health is manifest. Tuberculosis is less prevalent than formerly.

Dwellings.—Most Indians in Nova Scotia live in small frame houses, well finished outside, but usually in the rough inside. However, the general tendency is decidedly towards improving their condition in this respect. Quite a number live in roomy, comfortable dwellings, well finished throughout and fairly well furnished.

PRINCE EDWARD ISLAND

Agency.—One agency is sufficient for the purposes of the department in this province, as the total Indian population is only 292.

Tribal Origin.—The Indians of this province all belong to the Micmac tribe, which is of Algonkin stock.

Occupations.—Some of the Indians of Prince Edward Island work their land, but their principal occupations are fishing and basket-making. Some of the Indians own stock, which is of good quality, and well cared for.

The oyster fishing was this year a total failure, and the lobster fishing was less profitable than last season, and in consequence the income of the Indians has been reduced to a considerable extent.

MANITOBA

Agencies.—The following agencies are included in the province of Manitoba: Fisher River Clandeboye, Norway House, Griswold, Portage la Prairie and Manitowapah, Pas and Birtle.

Tribal Origin.—The majority of the Indians of Manitoba belong to the Ojibwa race, which is of Algonkin stock. Bands of Swampy Crees are found at the Norway House and Fisher River agencies and in the York Factory district; these are also of Algonkin stock. The Indians located at the Griswold agency are Sioux; there are also Sioux at the Birtle and Portage la Prairie agencies. There is a band of Chipiwyans at Fort Churchill; this tribe is of Athapascan stock.

Occupations.—In the agricultural parts of the province, wherein are situated the Birtle, Griswold, and Portage la Prairie agencies, the chief occupation of the Indians is grain-growing. In the Clandeboye, Fisher River, Norway House, Pas, and Manitowapah agencies, and throughout the northern districts the Indians continue to find their principal source of livelihood in hunting and fishing. The hunting and fishing Indians have not suffered from the increased cost of living, as the value of fish and fur has on an average since the beginning of the war been about double that during the five years prior to the war.

These Indians are expert guides and canoemen and many of them find employment at this work, for which they receive good wages.

In the more settled districts many of the young men receive high wages as farm labourers. Some also are employed at road-work, in mines and on railway construc-

11 GEORGE V, A. 1921

tion, and in most cases their services have been found very satisfactory by their employers. Some of the more educated Indians work as clerks for traders and merchants, and most of them have proved to be very efficient in their work. They are not so successful, however, when they undertake to trade independently, owing to their tendency to give credit to excess.

Some of the young women are skilled needle-workers, and earn a good living sewing for white settlers. A number also are employed as domestics. Among some of the bands the women derive a considerable income from the sale of willow baskets, rag and straw mats, moccasins, bead-work, senega root, and wild fruits.

The majority of the bands in the province raise stock.

Health.—The health of the Indians throughout the province has been very good during the past year, and a marked improvement is observable. The Indians are learning to pay much greater attention to sanitation and personal cleanliness.

There is a marked difference between the methods of housekeeping followed on the reserves of the settled parts of the province and in the more outlying districts. At the Birtle agency, for example, the houses are furnished with good iron beds, sideboards, tables, chairs, and good kitchen utensils, whereas at the Pas agency the Indians in most cases still prefer to eat and sleep on the floor.

Dwellings.—Most of the Indian houses are of log construction. The Indians are expert axemen, and their log houses are usually well built and comfortable. The houses in the more northern districts are, however, still of a very primitive type, being roofed simply with poles and mud, and usually have only one room. In the more settled parts of the province the Indians are beginning to build frame houses. Many of the Manitoba Indians continue to live in tent during the summer months.

SASKATCHEWAN

Agencies.—The following agencies are included in the province of Saskatchewan: Assiniboine, Battleford, Carlton, Crooked Lake, Duck Lake, Moose Mountain, Onion Lake, Pelly, Qu'Appelle, and Touchwood Hills.

Tribal Origin.—The most numerous tribes among the Saskatchewan Indians are the Ojibwas, Swampy Crees and Plains Crees, which all belong to the great Algonkin stock. In addition to these, Sioux Indians are found at the Assiniboine, Moose Mountain, Qu'Appelle and Carlton agencies, and on the Moose Woods reserve. In the Onion Lake agency there is a band of Chipewyans, who are of Athapascan stock. There are also a few Chipewyan Indians in the Isle a la Cross district.

Occupations.—The principal occupations of the Indians of Saskatchewan are farming and stock-raising.

The great majority of the farming Indians are well provided with farm machinery and implements, and in most cases they take good care of them.

With very few exceptions the bands in this province own herds of horses and cattle. The Indians as a general rule care well for their stock, and some of it is of exceptionally fine quality.

Many of the Indians work for white farmers in the harvest season.

The Indians in this province derive considerable income from the sale of hay, wood, pickets, and senega root.

In the northern part of the province, hunting and fishing are still very important sources of income to the Indians.

Health.—The health of the Indians of Saskatchewan has on the whole been good during the past year, although there is always a considerable amount of tuberculosis and scrofula among them.

SESSIONAL PAPER No. 27

The officers of the department are giving most careful attention to the instruction of the Indians in the principles of hygiene and sanitation, and a marked improvement from year to year in these respects is observable on the reserves.

Dwellings.—The great majority of the Indian dwellings in this province are of log construction. In the more settled districts they are usually two-storied, shingle-roofed, and well built. On the reserves which are farther removed from the centres of civilization the old style one or two-roomed, mud or thatched roof shacks of a very primitive type still predominate. Many of the Indians live in tents in summer. Some of the more progressive Indians are beginning to erect frame houses.

ALBERTA

Agencies.—The following agencies are included in the province of Alberta: Blackfoot, Blood, Edmonton, Hobbema, Peigan, Saddle Lake, Sarcee, Stony, and Lesser Slave Lake.

Tribal Origin.—The Alberta Indians are of Algonkin stock, with the exception of the Sarcees near Calgary and the Beavers and Slaves in the Lesser Slave Lake agency, who are Athapascan, and the Paul's band in the Edmonton agency, who are Iroquoian, and the Stonies, who are of Siouan stock. The Algonkin Indians of Alberta are subdivided into Blackfoot nation, comprising the Indians of the Blackfoot, Blood and Peigan agencies, Plain Crees found in the Lesser Slave Lake, Saddle Lake, and Habbema agencies, and a band of Ojibbewas at Moberley Lake, in the Lesser Slave Lake agency.

Industries and Occupations.—The principal occupations of the Alberta Indians are farming and stock-raising in the settled parts of the province. In the more remote northern districts they continue to gain their livelihood almost entirely by hunting, fishing and trapping.

Practically all the bands in the province own herds of horses and cattle, and their stock is of very fine quality. The Blood Indians have the largest herds, comprising upwards of 4,000 head of the finest beef cattle in the west. The Indians, as a general rule, care for their stock well.

The Indian farmers are well supplied with modern machinery and implements, except in the Stony and Lesser Slave Lake agencies, where little farming is done.

Health and Sanitation.—Tuberculosis, pneumonia, and scrofula are the diseases most prevalent among the Indians of this province, and in some bands they are responsible for a heavy mortality.

The Indians are very conservative, and it is difficult to bring about changes in their habits of living. Every effort is being made, however, to make them realize the vital importance of sanitary conditions, and a gradual improvement is observed from year to year.

Buildings.—With the exception of those living in the more remote northern districts, the great majority of the Indians of Alberta have modern frame houses, which in many cases are well built, well lighted, and well ventilated. Many of them have good barns, implement sheds and stables. Some of the Indians still live in tents and tepees in summer.

NORTHWEST TERRITORIES

Agencies.—The department has only two agencies in the Northwest Territories, one being located at Simpson, and the other at Fort Smith.

Tribal Origin.—The principal tribes found in the Far North are the Slaves, Hares, Loucheux, Secanies, Dogribs, Yellow-knives, Chipewyans and Caribou Eaters.

11 GEORGE V, A. 1921

All these tribes are of Athapascan stock. There are a few Crees in the neighbourhood of Chipewyan. These are of Algonkin stock. The most northerly tribes are the Tukudah, who extend to the Mackenzie Delta, and the Copper Mines, who are located along the Copper-mine river. The territory occupied by these two last-mentioned tribes is contiguous to that inhabited by the Eskimos.

Occupations.—These Indians are solely dependent upon fishing and hunting. In view of their nomadic mode of life it is difficult to induce them to take up agricultural pursuits, and they do no farming or gardening, with the exception of a few living in the vicinity of the forts, who raise some potatoes. In the summer some of the Indians are employed as pilots and deckhands on the steamers running on the Peace, Slave and Mackenzie rivers.

Health and Sanitation.—Tuberculosis and scrofula are the diseases most prevalent among the Indians of the Far North. Those who live in tents throughout the year are generally in better health than those who spend the winter in houses.

Every effort is being made by the officers of the department to make these Indians realize the value of hygiene and sanitation, but it is difficult to instruct them in these matters, as they are still in a very primitive stage of development.

Dwellings.—The majority of the northern Indians live in bark or skin tepees all the year round. Those who live in the vicinity of the posts have houses of a primitive type.

YUKON

Tribal Origin.—The Forty Mile, Blackstone, and Moosehide bands belong to the Takudh tribe. There is a band of Slavies at Lancing Creek who migrated from Fort Good Hope, on the Mackenzie river; another band of Slavies, called Nahanies, is located at the headwaters of the Pelly river. All these Indians are of Athapascan stock. At Mayo, Selkirk, Little Salmon and Carmacks there are bands belonging to the tribe known as Stick Indians. Bands belonging to the Tlinjit tribe are found at Whitehorse, Teslin Lake, Champagne Landing, and Carcross.

Occupations.—Hunting game, trapping furs, and fishing are the chief occupations of the Yukon Indians. The women also derive quite a revenue by the sale of moccasins and other articles made with either moose or caribou skin and ornamented with beads, silkwork, or dyed porcupine quills. Sleds and snowshoes are also made by the men and sold to the whites. The younger men work as deckhands on the steamers and in cutting cordwood; they occasionally act as guides and packers for hunting parties.

Owing to the nature of the country and climatic conditions very little is done in the way of farming.

Health and Sanitation.—The general health of the various bands has been fairly good throughout the year.

An epidemic of influenza broke out at Champagne's Landing last May; 125 Indians were affected and 11 deaths occurred; fortunately none of the other bands were affected at this time. Again on March 13 of this year the epidemic broke out at Carcross, first in the boarding school, and a few days later in the Indian village. There were 36 patients in the school with one death, and 12 in the village with two deaths. A small party of Indians at Upper LaBarge, 12 in number, were stricken with the same epidemic; three died and the others were removed to the hospital at Whitehorse. None of the other bands are affected up to date.

In spite of the efforts made to improve sanitary conditions I regret to say the progress is slow; however, I may say there is some improvement. The medical officers and the missionaries are doing all they can to deal with these matters. The indifference of the Indians is difficult to overcome but patient work is bound to tell in the long run.

SESSIONAL PAPER No. 27

The two medical officers have been diligent in their duties during the year and many Indians have been benefited by their efforts.

Dwellings.—Most of the Indians live in log cabins, especially those living near white settlements. Those that spend most of their time in the woods hunting live in tents for obvious reasons, they are constantly on the move from one place to another in search of game and furs.

Little has been done during the year in the way of building, new cabins materials being too expensive. There are some cabins at each of the centres one would like to see pulled down being unsuitable for dwellings; by degrees these are disappearing and larger, better lighted and properly ventilated cabins taking their place. More might have been done in this regard had material not been so costly.

Relief.—Due care has been exercised in issuing relief to the Indians, the amount given is not usually sufficient to support the recipient they are expected to try and help themselves. It is only the aged and infirm that receive assistance.

Temperance.—There has been considerable improvement in the matter of temperance during the year under review, due in some measure, no doubt, to the closing up of all the saloons and bars in the territory and the greater difficulty in obtaining liquor. Several convictions both against Indians and whites have been successfully made and either fines or imprisonment inflicted.

BRITISH COLUMBIA

Agencies.—The following agencies are included in the province of British Columbia: Babine and Upper Skeena, Bella Coola, Cowichan, Kamloops, Kootenay, Kwawkwalth, Lytton, Nass, New Westminster, Okanagan, Queen Charlotte, Stickine, Stuart Lake, West Coast, and Williams Lake.

Tribal Origin.—The Indians of the Bella Coola, Cowichan, Kamloops, Lytton, New Westminster, and Okanagan agencies belong to the Salish tribe. The Kootenay tribe is located in the agency of the same name. The Kwakiutl-Nootka tribe is located in the Kwawkwalth and West Coast agencies; the Haidas, in the Queen Charlotte islands; the Tlingits, in the Stickine; and the Tsimshians, in the Nass agency. The Indians of the Babine, Stuart Lake and Williams Lake agencies belong to the Athapascan race.

In addition to these there are about 3,000 nomadic Indians in the province who cannot be correctly classified according to linguistic stock or tribal origin.

Industries and Occupations.—The principal occupation of the Indians living on the coast is fishing, at which they have had a very successful year. Many of these Indian fishermen have gasoline launches, which they often construct themselves with great skill and efficiency. The Haida Indians of the Queen Charlotte islands are particularly proficient and are considered to be among the best fishermen on the Pacific coast. Many Indians, including a large number of women, are employed in the canneries. The occupation of the coast Indians also include logging, teaming, boat-building and hunting.

Hop-picking is an important source of revenue to the Indians of the Kamloops, Lytton, Cowichan, West Coast and New Westminster agencies.

The Indians of the Lytton, Kamloops, Kootenay, Okanagan, and New Westminster agencies engage in farming, including the raising of grains, fruit and vegetables of all kinds. Marked progress has of late years characterized their agricultural efforts. They are well supplied with farm machinery and equipment, of which they take good care.

11 GEORGE V, A. 1921

The Indians of the Kamloops, Kootenay, New Westminster and Okanagan agencies raise horses and cattle. They take good care of their stock, and are meeting with marked success in this industry. The Indians of the Kamloops agency own about 5,000 horses and about 2,000 head of cattle.

The Indians of the more remote northern districts still derive a livelihood from hunting and trapping.

The agents in all parts of the province report a constant improvement from year to year in sanitary conditions on the reserves, and the department is making every effort to educate the Indians in this respect.

Dwellings.—The great majority of the British Columbia Indians, except in the more outlying districts, now have modern, well-built, comfortable houses either of log or frame construction. This is an evidence of rapid progress, as a few years ago nearly all of them lived either in wretched little shacks, or herded together in the large barnlike unventilated and unsanitary structures, which are still in use in some of the more unsettled parts of the coast. The Haida Indians of the Queen Charlotte islands, who are remarkably progressive, build up-to-date frame houses that will compare favourably with those found in the average white community.

FINANCIAL

At the close of the twelve months ended March 31, 1920, the capital of the Indian Trust Fund, which at the end of the preceding year amounted to \$9,238,786.67, had increased to \$10,900,057.06.

The amounts expended from the Consolidated Revenue Fund were as follows: voted by Parliament for the purposes of the department, \$2,243,207.65; and annuities by statute, \$183,096.

On March 31 last, the balance to the credit of the Indian Savings Account for the funding of the annuities and earning of pupils at industrial schools, was \$84,271.54. Deposits and interest during the twelve months aggregated \$44,932.71 and withdrawals \$27,531.59.

I have the honour to be, sir,

Your obedient servant,

DUNCAN C. SCOTT,

Deputy Superintendent General of Indian Affairs.

General Remarks

The land sold during the year amounted to 114,819.07 acres, which realized \$1,088,898.73. The quantity of surrendered land in the hands of the department was approximately 196,113.34 acres. The principal outstanding, on account of Indian lands sold, amounted to \$2,412,405.40, a considerable portion of which has not yet become due.
